

Connecticut River Conservancy

The 29th annual Source to Sea Cleanup was once again a triumph of community action. People from across the Connecticut River watershed in NH, VT, MA, and CT came together to care for the rivers and ecosystems we all call home.

It's hard to capture the impact of 2,029 volunteers (as reported from registrations and trash tallies—the real number is even higher!), but within these pages you'll find powerful stories and photos from across the watershed. Group leaders, schools, businesses, nonprofits, individuals, and families all played a critical role in making this event a success. They gathered in groups large and small, working through mud, rain, and sunshine to collect litter, remove debris, and restore miles of riverbank.

Yet the cleanup is about more than picking up trash; it's a reminder to give back to the environment that gives so much to us. Everything we do on land affects our rivers and the wildlife that depend on them.

Throughout the year, the Connecticut River Conservancy (CRC) builds on this momentum with ongoing work—from water quality monitoring and dam removals to community science and advocacy. The cleanup is a vital part of broader efforts to ensure cleaner, healthier, life-filled rivers for all.

As we near three decades of the Source to Sea Cleanup, its legacy continues to grow. What began as a local volunteer effort has become a regional movement uniting thousands with a common purpose: ridding our waterways of trash and caring for the rivers that sustain us.

We hope you'll join us again in 2026 for the Source to Sea Cleanup's 30th Anniversary! Save the dates: September 18-19 (or a nearby date that works best for you and your crew).

For every volunteer, sponsor, partner, in-kind contributor, trash sorter, and community organizer—THANK YOU. This would not be possible without your dedication and support.

"I felt so satisfied and accomplished as I was walking back with a big bag of trash over my shoulder knowing that I helped to prevent some creatures from being harmed."
- Eve S.

Featured Community Stories

Essex 3 Villages Cleanup

This event was a collaboration with Sustainable Essex, the Connecticut River Museum, and the Essex Land Trust in CT. The land trust focused on two of its preserves, Turtle Creek and Great Meadow, where volunteers, including members of the Valley Regional High School's Environmental Club, collected substantial amounts of trash: styrofoam, all kinds of plastic items and bottles, glass, cans, and many more odds and ends.

Easthampton Beautification Team

The Easthampton Beautification Team returned for their seventh year of participation. With incredible leadership from Owen Zaret, Bombyx Center for Arts & Equity, and the Nashawannuck Pond Steering Committee, this team organized seven separate cleanup groups that spread across the town. After picking up trash, the groups rejoined and helped each other with the trash tallying.

Franklin County Rivers Cleanup

Over 579 volunteers fanned out across Franklin County, MA, this year, comprising 38 distinct cleanup events, spearheaded by a long-standing collaboration between the Green River and Gill-Montague Cleanups and CRC. Featured at the Greenfield site was Greening Greenfield who assisted volunteers in upcycling single-use grain bags into reusable shopping bags.

"Very high-spirited day at the Green River Cleanup where we gathered well over 16 tons of debris from the Town's four rivers and abundant brooks and streams."

- Michael Pattavina, Group Leader

State Legislators

We are honored to have local legislators who are so committed to clean and healthy waters that they make time to roll up their sleeves to join and host some of our groups. Enormous thanks to: Rep. Lindsay Sabadosa, Sen. Jo Comerford, Rep. Natalie Blais, and Rep. Renee LeMark Muir for their dedication.

Don't see your rep here? Call them to encourage them to get involved. Next year will be our 30th Anniversary year, and they won't want to miss it!

Cheshire County Cleanups

The Cheshire County Conservation District returned this year, hosting two cleanups in Keene and one in Swanzey, NH. The 55 overall volunteers included students from Keene State College Eco-Reps, Keene High School, and other local youth, and diverted over 1,800 pounds of trash from the Ashuelot River and Beaver Brook. Thanks to all!

Black River Action Team and Hypertherm

Hypertherm and Black River Action Team (BRAT) in Springfield, VT joined forces to clean up a total of 17 tires (including a very large tractor trailer tire down in a setback near Hoyt's Landing), 15.5 shopping carts, a relatively new bicycle, 4 bags of recyclable plastic, a full bag of redeemable cans & bottles, 10 bags of straight trash, and more. Shoutout to Kelly Stettner and all the RiverSweep teams!

Fort River Cleanup

The Fort River Watershed cleanup in Amherst, MA, boasted some impressive numbers. With over 200 volunteers, they collected and counted 1,016 cigarette butts, 4,236 pieces of foam packaging, 288 nips, and 161 pounds of scrap metal. That is now all trash diverted from our rivers and streams. This effort was led by Fort River Watershed Association members Brian Yellen and Victoria Quill.

All Out Adventures

All Out Adventures hosted its first-ever cleanup, bringing 20 paddlers—including 6 in-patient veterans, seniors, Smith College students, and community members—to remove debris from Elwell Island. Veterans expressed how meaningful it felt to give back to the river, while students shared their drive to connect activism with action.

Steppenwolf 1969 Magic Carpet Ride

Wethersfield Cove and Great Meadows Conservation Trust

"Friday evening was a wonderful experience. We started at 4pm and went right up until dusk and then enjoyed some pizza provided by the Dad's Club. Saturday morning is always major - we have so many volunteers and it covers such a large area that we have to have them check out when they leave to make sure we have not left anyone "out there!" -Group Leader and CRC Board of Trustees member, Tim Lewis

Lost and Found

Wallet Returned After Missing for 25 Years!

During the Deerfield River Trout Unlimited cleanup in Franklin County, a black purse covered in moss was found and almost landed in the trash! Fortunately, it was opened and inside was a set of keys and a fully intact wallet from about 25 years ago. Charlemont Transfer Station Attendant Thorne Palmer Googled the name on the multiple cards in the wallet, and made contact with the owner, a teacher from Rhode Island. In the year 2000, as she and her friends tubed down the river, her car was unfortunately broken into and her purse stolen. It ended up in the woods of Charlemont... until cleanup day! The owner was amazed to get the call from Thorne and said it made an unfortunate experience into a great story.

Trash Tally 2025

Total Volunteers: 2,029

Total Cleanup Groups: 126

Total Beverages: 15,893

Total Tires Collected: 396

Total Miles Cleaned: 82.3

Total Weight: 35.74 Tons (71,480 lbs)

Frequently Found Items:

Nip Bottles: 4,534*

Scrap Metal: 7,255.5 lbs.*

Cigarette Butts: 3,336

Mattresses: 61

Construction Materials: 404

Toys: 1,347

Electronics: 75

Automotive Waste: 219*

Clothing: 622

Personal Hygiene: 453

Styrofoam pieces: equivalent to 811 kitchen-sized garbage bags

Total tons since 1999: 1,182

Unusual Items Found:

Eyelash curlers, toilet seat, gumball machine, hot dog roller machine, fireworks, hoverboard, antique harness for a horse, silly string, shrimp, etc.

*Data reported from CRC Trash Tally only. All other data is reported from CRC Trash Tally + Clean Swell app.

All data based on submitted information from volunteers which does not include all volunteers or all trash collected. True totals are likely higher.

SUPPORT A CLEANER, HEALTHIER CONNECTICUT RIVER!

THANK YOU for all you do for our rivers. While the Source to Sea Cleanup is a major annual event, the work of the Connecticut River Conservancy and our many regional partners happens all year round. From removing obsolete dams and aquatic invasive species to advocating for better policies and testing water quality in our lab, we take a watershed-wide approach to just about everything. Your support makes it possible!

Connecticut River Conservancy staff in 2025

LOOKING FOR WAYS TO SUPPORT CLEANER RIVERS? TRY THESE ACTIONS:

Be prepared for a cleanup any time of year – Carry a reusable bag and gloves when you're out in nature so you can safely collect litter. Encourage friends or coworkers to join you for a quick cleanup whenever possible.

Raise awareness – Share facts about river health on social media or in conversations. The more people understand the issue, the stronger the movement for change.

Choose sustainable products – Opt for items that are durable, refillable, or compostable. Avoid single-use plastics and packaging that often end up in waterways.

Model good habits – Take care of waste responsibly, recycle when you can, and show others that small actions add up. Your example can inspire your community.

Support policy solutions – Stay informed about local and state legislation that impacts rivers. Sign up for email alerts, write to your representatives, and speak up when decisions are being made.

For more actions visit:

sourcetoseacleanup.org/share-your-impact

In addition to organizing the Source to Sea Cleanup, the Connecticut River Conservancy works to support clean water, healthy habitats, and resilient communities in many ways. Stay tuned for upcoming volunteer opportunities, community events, and ways to get involved in spring 2026. Visit ctriver.org for more details.

Special thanks to our national nonprofit partner, Ocean Conservancy (OC), and their International Coastal Cleanup. CRC has teamed up with OC for 20+ years, working towards cleaner waterways around the U.S. and the world.

CRC's trash data is sent annually to OC and is integral to the [TIDES database](#) of ocean trash, used to advocate for better trash solutions - nationally and globally!
